

## LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
I-1. Annual total reconstructed light extinction coefficient ( $\text{Mm}^{-1}$ ) calculated from the aerosol concentrations at each operational site in the IMPROVE network for the period March 1992 through February 1995.....	I-20
I-2. Seasonal visibility across the continental United States calculated using $b_{\text{ext}}$ data from each operational transmissometer site in the IMPROVE network for the period March 1988 through February 1995.....	I-21
I-3. Annual average percentage of total light extinction (including Rayleigh) contributed by sulfate, nitrate, organics, elemental carbon, and coarse particles for the central Rocky Mountain, northern Rocky Mountain, and northern Great Plains regions (March 1988 through February 1995). ....	I-25
I-4. Annual average measured fine aerosol mass budgets (in percent) for the central Rocky Mountains, northern Rocky Mountains, and northern Great Plains regions (March 1988 through February 1995). ....	I-28
II-1. National parks and major cities of the Rocky Mountain and northern Great Plains regions .....	II-5
II-2. Air quality monitoring and meteorological sites for Colorado .....	II-7
II-3. Air quality monitoring and meteorological sites for Wyoming .....	II-8
II-4. Air quality monitoring and meteorological sites for Montana .....	II-9
II-5. Air quality monitoring and meteorological sites for North Dakota.....	II-10
II-6. Air quality monitoring and meteorological sites for South Dakota .....	II-11
II-7. 1996 $\text{SO}_2$ point sources for the Rocky Mountain and northern Great Plains regions .....	II-16
II-8. 1996 $\text{NO}_x$ point sources for the Rocky Mountain and northern Great Plains regions .....	II-17
III-1. Soils map of the Loch Vale watershed (from Walthall 1985 .....	III-2
III-2. Vegetation classification map of ROMO, from park database.....	III-4
III-3. Map of ROMO and air quality monitoring sites.....	III-17
III-4. Diurnal ozone concentrations at ROMO and other locations along the Front Range on July 2, 1993.....	III-18
III-5. Nitrate concentration measured in alpine lakes east of the Continental Divide throughout the length of Colorado and in southeastern Wyoming .....	III-26
III-6. Watersheds of ROMO studied by the U.S. Fish and Wildlife Service .....	III-27
III-7. Predicted acidity (expressed as pH) of snowmelt at Buffalo Pass, adjacent to the Mt. Zirkel Wilderness Area, compared with expected salamander egg mortality at various pH values .....	III-37
III-8. Daily discharge (A) and nitrate concentration (B) in Icy Brook and Andrews Creek within the Loch Vale watershed in April-September 1992.....	III-39
III-9. Seasonal average reconstructed extinction ( $\text{Mm}^{-1}$ ) for the period March 1988 through February 1995.....	III-46
III-10. Reconstructed extinction budgets for Rocky Mountain National Park, Colorado, March 1988 - February 1995.....	III-48
III-11. Annual arithmetic mean and cumulative frequency statistics, Rocky Mountain National Park, Colorado, transmissometer data (filtered) .....	III-52
III-12. Photographs illustrating visibility conditions at Rocky Mountain National Park .....	III-54
IV-1. Soil classifications of GRTE .....	IV-2
IV-2. Land cover of GRTE .....	IV-4
IV-3. The elevational distribution of major forest types near GRTE .....	IV-5
IV-4. Location of lakes sampled by Gulley and Parker in GRTE .....	IV-15
V-1. Regional-geological map of YELL (adapted from Cox 1973 by Gibson et al. 1983) .....	V-3
V-2. Major vegetation types, roads, and large lakes in YELL .....	V-5
V-3. Air quality monitoring locations at YELL.....	V-10

<u>Figure</u>	<u>Page</u>
V-4. Alkalinity map for lakes in YELL, prepared from existing data by Gibson et al. (1983). ....	V-17
V-5. Seasonal average reconstructed extinction ( $Mm^{-1}$ ) YELL, March 1988 through February 1995.....	V-20
V-6. Reconstructed extinction budgets for YELL, March 1988 - February 1995.....	V-21
V-7. Annual arithmetic mean and cumulative frequency statistics for YELL, transmissometer data (filtered) .....	V-26
V-8. Photographs illustrating visibility conditions at Yellowstone National Park .....	V-28
VI-1. Annual average daily fluoride emissions from Columbia Falls Aluminum Co. plant from 1957 to 1992 (Columbia Falls Aluminum Co., Columbia Falls, MT).....	VI-6
VI-2. Location of the air quality monitoring site at GLAC. ....	VI-9
VI-3. Mean alkalinity concentrations regressed against mean conductivity values for the frontcountry and backcountry lakes of GLAC, 1984-1990. $R^2=0.989$ . ....	VI-11
VI-4. Time series plot of pH in Snyder, Upper Dutch and Cobalt Lakes, GLAC, 1984-1990.....	VI-12
VI-5. Transects of vegetation sampling for fluoride done in Flathead NF and GLAC in 1970 by USDA Forest Service and National Air Pollution Control Administration .....	VI-17
VI-6. Isolines of fluoride (ppb) measured in foliage samples taken along transects from Columbia Falls Aluminum Company in 1970 (provided by GLAC).....	VI-18
VI-7. Permanent vegetation sampling locations in the southwestern portion of the park .....	VI-19
VI-8. Seasonal average reconstructed extinction ( $Mm^{-1}$ ) GLAC, March 1988 through February 1995.....	VI-21
VI-9. Reconstructed extinction budgets for GLAC, Montana, March 1988 - February 1995. ....	VI-23
VI-10. Annual arithmetic mean and cumulative frequency statistics, GLAC, Montana, transmissometer data (filtered). ....	VI-27
VI-11. Photographs illustrating visibility conditions at Glacier National Park .....	VI-28
VII-1. Oil and gas well locations in the vicinity of the North Unit .....	VII-7
VII-2. Oil and gas well locations in the vicinity of the South Unit .....	VII-9
VII-3. Water quality monitoring locations in THRO .....	VII-17
VII-4. Water quality monitoring site identification numbers in the North Unit (Panel A) and the South Unit (Panel B) .....	VI-18
VII-5. Measured $Ca^{2+}$ , $Mg^{2+}$ , and pH values of water quality monitoring sites for which data are available.....	VII-20
VIII-1. Distribution of forest and grassland vegetation in WICA. ....	VIII-3
VIII-2. Weekly average ozone concentration, based on passive ozone sampler data from WICA .....	VIII-7
IX-1. Seasonal average reconstructed extinction ( $Mm^{-1}$ ) for BADL, March 1988 through February 1995.....	IX-10
IX-2. Reconstructed extinction budgets for BADL, March 1988 - February 1995. ....	IX-11
IX-3. Annual arithmetic mean and cumulative frequency statistics, BADL, South Dakota, transmissometer data (filtered) .....	IX-15
IX-4. Photographs illustrating visibility conditions at Badlands National Park.....	IX-17
